

Program Image Label on top of website with name 'Finbot' to the right
FinBot -

**Empower Your Future, Secure Your Wealth: Let Our Financial Advisor Guide You
Towards Financial Freedom and Retirement Bliss.**

Main page - Welcome statement in format of user name inputted in database

Box for entering input - 'Please enter your prompt'

Input box should be clear, rounded corner design

Visual hierarchy: Highlight key features and call-to-action buttons

Design conversational flows that feel natural and intuitive

Concise error messages that are helpful and actionable, guiding users on how to correct their input

Consistent Layout: Maintain a consistent layout throughout your website. Keep navigation elements, such as the menu, in the same location on every page to help users easily find their way around.

Breadcrumb Navigation: Implement breadcrumb navigation to show users their current location within the website's hierarchy. This helps users understand where they are and how to navigate back to previous pages.

Shorten Navigation Paths: Minimize the number of clicks required for users to reach their desired destination. Streamline navigation paths by reducing unnecessary pages or steps.

Visual Cues: Use visual cues such as hover effects, buttons, and icons to indicate interactive elements and navigation options. These cues help users understand what actions they can take on the website.
